

Add New Application

Overview

The following information will appear with your application in the App Store.
Required fields are in **bold**.

Please provide this information in **English**.

Application Name :

Application Description :
- Browsing of forums, threads, and posts.
- Tab-based pagination of posts within threads
- "Jump to Bottom" by double-tapping on the navigation bar, which makes finding updates to large threads easier
- Built-in web browser for posting replies and viewing links, including YouTube videos, without exiting MobileGAF
- Rich text styling in posts, which was made possible by the Three20 library
- Image scaling to reduce the amount of memory used when loading graphic-intensive threads.
